

Guide of installation Guerbet Screen saver (PC version / English)

1/ Open the file “screen-saver-pc”.

2/ Click on the file “screensaver_setup” , then accept the program of installation.

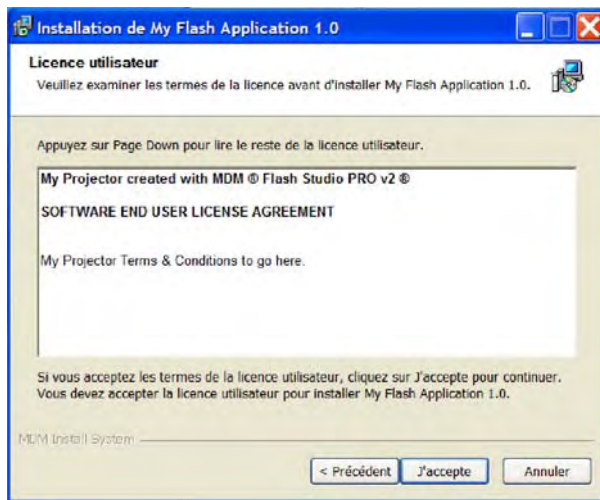

3/ A window is opening on an installation program for “MDM My flash application 1.0”.
(Window’s text : welcome in the program of installation of My Flash Application 1.0.
You are about to install “My Flash Application 1.0” on your computer. Before beginning the installation, it is recommended to close all other applications. It will allow you to update some system files without restarting your computer.)

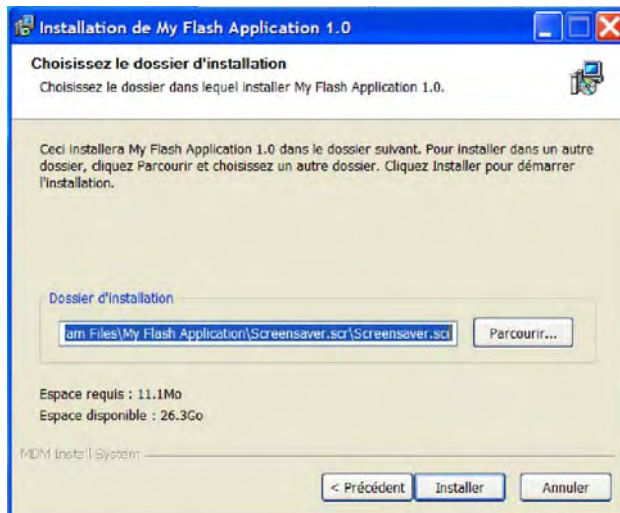

Click on the “Suivant >” button.

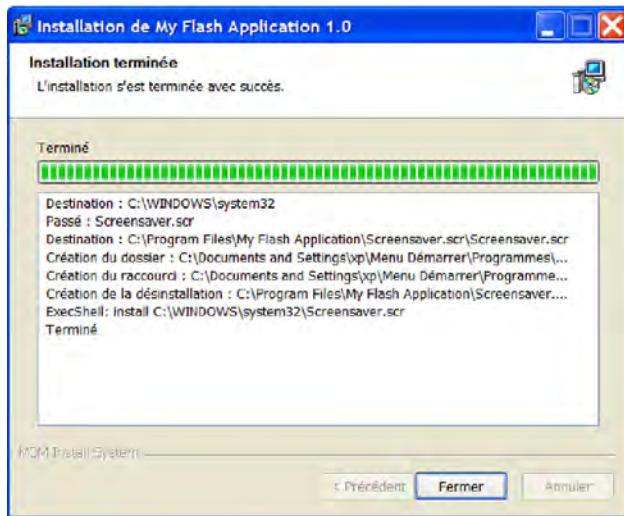

4/ This program is in French language, but it gives you an international license. Accept it to install the screen saver.

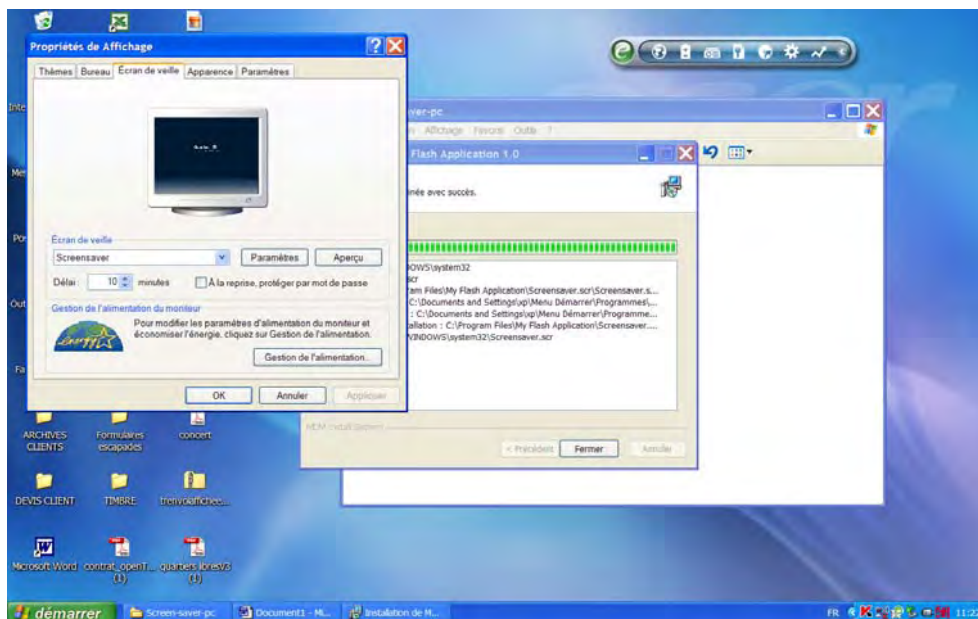

5/ The program determines the best place in your files of program. Click on the button "Installer" if it is convenient to you.

6/ The installation is very fast. You just have to click "Fermer" when the process is finishes.

7/ Automatically the window "propriétés de Affichage" opens on your desk. By default, this one presents the tab screensaver (a small computer screen allows to show the animation - Windows XP) and indicates "screensaver" in the drop-down menu. Click on OK without modifying the parameters.

Your screen saver Guerbet is installed! When your computer will set in sleep mode the next time, you will discover it finally!
